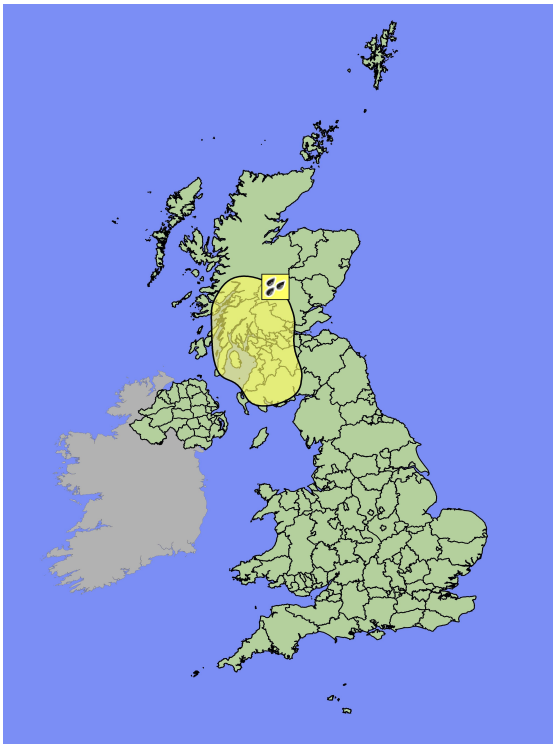
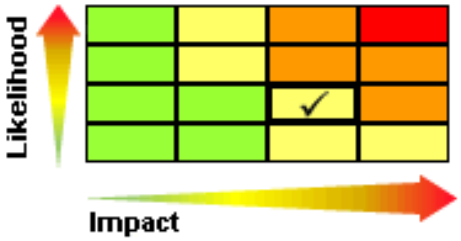
National Severe Weather Warning Service





Chief Forecasters Assessment
A slow moving front with a narrow band of heavy rain will affect parts of western and central Scotland on Tuesday. This is expected to move erratically during the first half of the day making it difficult to predict its position with confidence, though it brings the potential for as much as 70 mm locally.

The Met Office have issued a **Yellow Alert** of **Rain**

Valid from **03:00 on Tue, 29th Nov 2011** until **18:00 on Tue, 29th Nov 2011**

Rain will become heavy and persistent for a time on Tuesday, and this will fall on already saturated ground, leading to the risk of localised flooding and some travel disruption. The rain will clear from the west later in the afternoon.
